THE REVOLUTIONARY AUTO SCRUBBER

THE 1700E HIGH PERFORMANCE AUTOMATIC SCRUBBER

Fully featured and easy to operate, the **1700E** automatically lays the solution on the floor, scrubs with a powerful 40cm pad or brush, then collects the dirty solution in one pass, leaving the floor clean and dry.

A 2 year warranty covers the famous **Polidrive** sealed and oil-filled direct drive gearbox.

The **Poliflow** brush rotation system facilitates forward propulsion of the machine.

The **1700E** features a swivel 50cm replaceable cartridge squeegee for forward or reverse pick up and a quick release brush/pad coupling for attachment or removal without leaving the controls.

The polypropylene tanks offer strength, durability and long life as they will not rust, dent, chip, crack, peel or fade.

As the most economically priced 40cm **AutoScrubber** on the market today, the **1700E** has been revolutionary in achieving cost-effective floor maintenance with its impressive 750 square metres per hour production rate.

SPECIFICATIONS

MODEL:	1700E
DRIVE MOTOR:	550 watt, 240 volt, 50 cycle, 1440 RPM, 4 pole capacitor start
PROPULSION:	Poliflow brush rotation system facilitates forward movement
VACUUM:	1000 watt 2 stage tangential 240 volt 50 cycle automatic actuating electric vacuum motor
SOLUTION CONTROL	Fully variable with flow control on handle
TANK:	Polypropylene with clear lids
SOLUTION TANK CAPACITY:	20 Litre
RECOVERY TANK CAPACITY:	20 Litre
CABLE:	15mt heavy duty grade orange flexible with built in neon safety indicator and strain relief

Ergonomically designed handle and tank configuration with cable strain relief, power indicator lights and cable operated squeegee lift

Polidrive single reduction helical gear running with deep grooved ball-races in a sealed oil filled gearbox

Quick release brush/pad coupling for attachment or removal without leaving the controls

Swivel type 50cm squeegee with a fully adjustable and replaceable cartridge that picks up in forward or reverse.
